Tools: Docker

Operating Systems: Linux, windows, macOS

Education

PG Diploma in Advance Computing (CDAC)
Sunbeam Institute of Information Technology, Pune-Karad ⧉
May 2021 – September 2021

Master of Science - M.Sc. (Mathematics)
Modern College of Arts, Science and Commerce, Pune ⧉
June 2018 – April 2020

Bachelor of Science - B.Sc. (Mathematics)
S.N Arts, D.J.Malpani Commerce and B.N.Sarda Science College, Sangamner ⧉
July 2015 – April 2018

Professional Experience

Cybage Software Pvt Ltd ⧉
Software Engineer
January 2022 – present | Pune, India

Project Title: Classy-dev ⧉
Project description: Classy connects nonprofit organizations with supporters through innovative online fundraising experiences.

Roles and Responsibilities:
- Managed the integration of server-side functionalities with React and TypeScript for the Admin Dashboard, improving operational efficiency and user experience.
- Implemented Figma designs into interactive features with React and TypeScript, enhancing user engagement and navigation.
- Enhanced application performance by optimizing data fetching, utilizing GraphQL alongside RESTful APIs.
- Ensured software reliability and maintainability by writing comprehensive unit test cases to rigorously test code functionality.
- Demonstrated proficiency in Git, employing branching, pull requests, and custom deployment pipelines for thorough testing.
- Achieved consistent deployment processes across diverse environments through application containerization and deployment using Docker.
- Engaged in daily stand-ups, sprint planning and retrospective meetings to deliver high-quality software iteratively and on schedule

Project Title: GBS_Transform
- Developed and tested REST APIs by analyzing SQL queries, enhancing system functionality and security.

Personal Projects

Foodies ⧉
May 2024 – present
Technologies Used: React.js, Redux, Tailwind
- Foodies is an online food ordering web application based on Swiggy's live API.

Parikrama Tours ⧉
May 2023 – December 2023
Technologies Used: React.js, Node.js, mongoDB (Mongoose ODM)
- Created and deployed a user-centric application with backend on render.com, frontend on netlify.com, featuring registration, login, tour booking, and admin management capabilities
- Integrated Mailtrap for password reset and Mapbox for interactive tour mapping, enhancing user experience.
